Minutes of the M.D. Council of Michichi

The council of the Municipal District of Michichi, No 277, met at the council chambers at Michichi, Alberta, on the 6th day of April, at the hour of one o'clock p m

Present — Reeve Edwards, Dep.-Reeve Jones, Couns. W. J. Blair, H. Joberg, and O. B. Murdoch.

At the opening of the meeting Dep.-Reeve Jones filed his resignation as such with the council. It was then moved by Reeve Edwards that the resignation be accepted, and upon a vote being taken the motion carried upon the following division: For—Reeve Edwards, Couns. Jones, Joberg and Murdoch. Against—Coun. Blair.

It was moved by coun. Jones that O B. Murdoch be appointed Dep.-Reeve for the balance of the six month term, from March 18th. Carried unan.

The minutes of the meeting of March 13th were read by the sec.-treas., and their adoption moved by coun. Blair. Carried unan.

An outline was given by the secretary of the estimated requirements in connection with seed grain, and upon it being pointed out that there was a probability that the original by-law would be insufficient in terms of money to supply the amount of seed grain required, it was moved by Dep.-Reeve Murdoch that a supplementary by-law number 79 be passed in the amount of $2,000 00, and that such by law receive its first, second, and third readings at this meeting.

By law number 79 was then presented to the council.

First reading moved by coun Joberg. Carried unan.

Second reading moved by Reeve Edwards. Carried unan.

Third reading moved by coun. Jones. Carried unan.

Regulations in respect to the distribution of seed grain and fuel oil under the Agricultural Relief Advances Act were then outlined, and all applications to date presented to the council for their examination.

Correspondence was read from the Department in connection with the appointment of a weed inspector, whereupon it was moved by coun. Blair that the appointment of a weed inspector be tabled until a later meeting. Carried unan.

It was moved by coun. Blair that the rental arrangements in connection with the S. E. 21-29 17-w4, owned by the municipal district be tabled until the May meeting, so that some investigation might be made in connection with the performance of the undertakings made in the rental arrangements of the year 1936. Carried unan.

It was moved by coun. Jones that there would be a difference of three cents in the price of seed oats between those taken off the car and those out of the elevator. Carried.

Correspondence from theCanadian Farm Loan Board in connection with the seed grain liens and taxes on the S. ½ 5-30-18-w4, formerly occupied by Mr. Skelton, whereupon it was moved by coun. Blair that the proposal of the Farm Loan Board in respect to the same as outlined in their correspondence, be accepted, and that the collection branch be advised Carried unan.

After some discussion in connection with the rights of the municipal district under the Tax Recovery Act in respect to land which had been offered for sale, it was moved by Dep.-Reeve Murdoch that the Thompson place, known as the S.E. 2 29-19 w4, be rented to B. Wade for the balance of the year 1987, under the provisions of the Tax Recovery Act and amendments thereto, and on the usual rental arrangement providing for the return of a one third share of the crop, and to contain also provision to reimburse the tenant for any summerfallow performed in the proper season in excess of the amount of such summerfallow which he found on the premises at the beginning of his tenancy. Carried

The requisition of the Drumheller Hospital District No. 8, in the amount of $4 000 00 was presented to the council.

The requisition of the Hanna Hospital District No. 9, in the amount of $687.00, was presented to the council.

WHEAT BOARD BALLOT URGED AT GRAIN PROBE

Two Alberta Farmers Offer Plans To Cure Problems

At the Turgeon royal grain inquiry sittings in Calgary William Denton, of Benton, Alberta, suggested balloting to decide advisability of operating a wheat board, and followed shortly after with the assertion that many farmers after selling their grain would, under ordinary circumstances, dabble in futures in any event.

In the course of his verbal presentation before the commission, Mr. Denton expressed doubt as to the efficiency of any government board and went on record as definitely favoring less government interference in business. At the same time he stated, in reply to questions of J. E. Coyne, assistant commission counsel, that he had increased original homestead holdings through hard work and now found it necessary to lease his property from a provincial administrative board, when the only burden against it was taxes and advances from the government.

Will Come Back

Mr. Denton, who farms 200 acres near the Saskatchewan border, was of the opinion drouth areas should not be abandoned. His farm had produced well for 22 years He thought it would come back, and with one good crop he could see a much brighter prospect

Mr. Denton added that he did not consider a farmer was gambling when he utilized the futures market only to cover what he had produced and sold. After that, the situation assumed a different complexion, he thought.

Mr. Rawlins, farming at Turin, 37 miles north-east of Lethbridge, for the past 27 years, presented his brief, which by way of introduction, suggested the Turgeon commission "had the chance of doing the next greatest thing for Canada since Confederation.

"That is," he added, "if it brings in a report that will give real justice to the grower and protection to the consumer—otherwise it will go down as just another unsatisfactory investigation."

Expressing the opinion the grain exchange had "failed miserably," Mr. Rawlins drew attention of the commission to the 1928 9-30 situation when, he said, "the exchange did not function as we are now told it does by its defenders." Taking exception to the existing exchange methods of marketing he said that "all that is necessary is to co ordinate the whole grain industry."

He proposed a grower-elevator company, milling and bakery set-up to handle all wheat and eliminate speculation and risk. His summarized suggestion was to co-ordinate the several branches of the wheat industry through three possible means—co operation of those interested; government compulsion, and lastly, "the way it has been done in Russia, Germany and Italy."

(Continued from preceding column)

Moved by coun. Blair that each councillor arrange to hold a Red Cross Social in each division at a time to be determined in the future, proceedings of the same to be donated to the Red Cross, Alberta Division Carried unan.

It was moved by coun Jones that all relief accounts for the month of March be approved. Carried.

Moved by Dep. Reeve Murdoch that accounts listed on schedule 'A' attached hereto be approved and ordered paid, and that pay sheets listed on schedule 'B' attached here to be approved and ordered paid Carried unan.

The adjournment of the meeting was moved by Dep.-Reeve Murdoch

ACCOUNTS PAYABLE

Portage la Prairie General Hospital	$ 23 50
Johnson Drug Co.	7 75
Provincial Treasurer (Mothers' Allowance)	17 50
Humphries Funeral Home	100.00
Alberta Municipal Stationers	31 05

United Grain Growers (Gopher Poison)	134.55

Change

(By W. J. CAMERON, of the Ford Motor Company)

Has the world changed as much as they say it has? And need that affect us much as they say it does? If life is no longer basically the same, if the pathways the generations have followed no longer lead anywhere, we ought to know it. We ought, at least, to obtain a clear idea of *change or of our discovery and reaction to change.*

And this may easily be done, for change is merely a passing discovery every generation makes, each in its turn. Contemporary documents of every people launched upon the central stream of progress, show that, from ancient times until now, no generation has passed without experiencing a deep sense of change. Seen through the long vista of time, certain periods may seem to us staid and placid and uneventful, may seem stationary or even stagnant, yet the people of those periods too were startled by change. The Arcadian times we long for never existed. If surviving classics seem to say otherwise, it is because the classics were rooted in something changeless.

But before making this discovery, every generation passes half its life in a changing world and never knows it. Even our own generation—the elder part of it—now so acutely conscious of change, was occupied for more than half its life with the things that do not change. Childhood and youth with their blossoming energies. Early manhood and womanhood with their aptitudes and gifts and needs for expression, leading them into the work of the world, to the establishing of homes, to the rearing of families, to all the other rights and privileges pertaining to our membership in this vast, mysterious, miraculously unified whole which we know as human society. These periods of growth and experience hold the centre of our stage and shut all else out, because they belong to the changeless order of life.

Sooner or later, in whole or in part, these common and universal experiences are incorporated into our lives. Not that we outgrow them, we absorb them. And then we are free to turn and look at the world objectively, and what we behold is—change. Sometimes it startles us, as if the very foundations were disappearing. Life seems suddenly to swing round and confront us with an alien face. If we have been ill instructed, if we are so unfortunate as to have no roots in the racial, religious, experimental wisdom garnered by mankind through the ages, we call "change" by other names, we call it "uncertainty" or "insecurity," and frighten ourselves, and catch a glimpse of chaos, and harken to the panic-mongers. And, where once we looked back with Arcadian longing, we now commit the counter-folly of looking ahead with fear. Yet change did not begin with our discovery of it; this is the way life has always been. What has happened is simply that we have grown a little taller and can now look over the hedge that used to bound our vision. We are only seeing things as they always are.

This discovery of change, however, is neither the last nor the most permanent discovery a generation makes. It is followed by another, that beneath all alteration and transition there is a deeper changeless principle. Even while we are unsettled by the obsession of change, the stable elements of life are asserting themselves and holding us steady. The world does not fly off its base. There is day and its duties, night and its stars. There is the procession of the seasons, and the ceaseless operations of the laws of friendship and work. Two plus two continues to be four; black and white remain, one black, the other white; a lie is a lie and truth is power. Whatever answered men's hand and heart and vision anytime and anywhere, will answer them now. All the durable advance and constructive improvement, and abiding character of any generation are built by men and women who have made this latter discovery. They have reached *maturity.*

There need be no bewilderment amongst us, old or young. The same sort of behavior, of effort, of motive and application that brought desired results to men before our time will bring them now, and more certainly, for facilities have increased Universal forces in the service of individual life remain. Normal powers normally applied by average persons, work the same results they have always wrought. Don't let anyone persuade you otherwise. Strike out on the road with confidence; it will bear you up, and it leads somewhere. Your rights and duties as a member of human society have not been changed; nothing can deprive you of them save a false belief that they no longer exist. They *do* exist. The changeless verities are real for multitudes around you. They will prove real for you.

Canadian National Railways Revenues

The gross revenues of the all-inclusive Canadian National Railways System for the week ending April 21st, 1937, were $3,878,043, as compared with $3,595,061 for the corresponding period of 1936, an increase of $282,982.

The skins of animals were the earliest forms of money.

Enterprise Social Club

The monthly meeting of the Enterprise Ladies' Social Club met at the home of Mrs E Reid on Wednesday afternoon, April 7th.

Mrs. H. Humphrey, president, opened the meeting with the Woman's Creed, and in the absence of Mrs. H. McGivern, sec. treas, Mrs. D. Miles acted in that capacity.

Roll Call was answered by "What the Club has meant to me." Each member in turn gave an encouraging reply, making us feel our club is surely worth while. A short discussion took place about the proposed entertainment, but as there were only a few members present it was decided to meet at the home of Mrs D. Miles on Friday afternoon to decide about it. This closed the business, and a social visit was spent followed by a delicious lunch served by the hostess, assisted by Mrs. W Nichol and Mrs. C. Church.

On following Friday afternoon a goodly number of members met at the home of Mrs D Miles to decide about proposed entertainment. After the usual pros. and cons., it was decided to hold it on Friday, May 21st. Please keep date in mind and watch for further announcement.

The May meeting will be held at the home of Mrs. W. Harrison. A paper by Mrs Clarke on "Mother's Day" will be given.

Closed Season For Fishing

In an interview given last week by the Honourable N. E. Tanner, Minister of Lands and Mines, emphasis was laid on the fact that a closed season for angling, domestic or commercial fishing existed at present for all classes of fish

"Anyone employed in any form of fishing at the present season or being in possession of freshly caught fish or endeavouring to sell the same would immediately become liable to prosecution," the Minister stated.

Instances had occurred lately, Mr. Tanner remarked, of people who had been guilty of an infringement of the regulations in this respect, which necessitated a warning being sent to all proprietors of restaurants and hotels to the effect that the purchase of any Alberta fish, other than the frozen product, was at the present time illegal and subject therefore to the penalties as laid down in the Act.

Misrepresenting Mr. Aberhart

"Cavalcade," a British weekly news magazine, which takes pride in its briskness and accuracy, tells the world something of Alberta in the following:

"Probably most famous Empire Premier is Alberta's William Aberhart, who was elected eighteen months ago on his Social Credit plan, which proposes to provide credit of 25 dollars a month for every needy citizen of Alberta more than 50 years old.

"Bible-class teacher Aberhart admitted, in a speech to the Prophetic Bible Institute recently, that he has offered to resign his office if his supporters wished it, said adverse economic conditions had made it impossible for the government to fulfil its hopes of paying the £5 a month. Whether he should go or stay was to be decided by ballot before June 1."

Dominion Bureau of Statistics

(Issued April 27th, 1937)

Registrations of Births, Deaths and Marriages, March, 1937

The Dominion Bureau of Statistics issues today the number of registrations of births, deaths and marriages during the month of March, 1937, in 67 cities and towns of Canada having populations of 10,000 and over.

Births registered in these cities and towns in March numbered 6,923, deaths 5,025 and marriages 2,143, as compared with 7,172 births, 4,706 deaths and 1,838 marriages in March of last year, showing a decrease of 3½ per cent. in births, and increases of 7 per cent. in deaths and 16½ per cent. in marriages respectively.

Births registered during the three months January–March of this year totalled 19,334, deaths 15,067 and marriages 6,456, as against 20,169 births, 13,613 deaths and 6,146 marriages during the corresponding three months last year. This comparison shows a decrease of 4 per cent. in births, and increases of 10½ per cent. in deaths and 5 per cent. in marriages respectively.

"Girl Collects Sand Grains," says a headline in a New York newspaper. Heck, that's not news. Our farm girls always have had plenty of grit.

House Passes Vehicles Bill

When the bill to amend the Vehicles and Highways Traffic Act was before the legislature for final consideration recently, new amendments introduced by Hon. E. C. Manning, provincial secretary, provided for removal of minimum fine provisions.

Formerly, those convicted for a first offence under the Act were liable to a minimum fine of $5 00 and costs. Now that has been removed, so that a magistrate may order a fine of $1 00, or such lower amount as he may feel impelled to impose.

To curb the glare headlight menace, the amending bill also provides that car lights shall show objects ahead with clear visibility for a distance of 200 feet. Formerly the distance was 350 feet.

Right of police to make inspections of brakes at any time, and the need of dimming lights when meeting other cars, also are provided for in the new Act which is now in effect.

Canadian Control of Arms

In the House of Commons, Hon. J. L. Ilsley, minister of national revenue, introduced a bill to amend the Customs Act which, when effective, will clothe the Governor-in-Council with wide powers over every type of traffic in implements and materials of war.

A new section, 290, replacing the former section, authorizes the government to require permits from exporters or transporters of such materials and prescribe fees, regulations and conditions under which permits may be obtained.

Prohibit, restrict or control export to any destination, import or transport in coastwise or internal trade.

License persons manufacturing, exporting or importing; publish information and statistics on export, import or manufacture.

Goods imported or exported contrary to regulations made under the Act may be seized and forfeited

Don't Neglect to Send Mother's Day Telegram

Mother's Day is one of the most widely observed special occasions in Canada, next only to Christmas and Easter in popularity. When the observance of Mother's Day began, in 1910, only a few hundred sons and daughters sent telegrams, but as soon as the occasion became known generally, telegraphed greetings from absent children to mothers immediately became popular. This year, on Sunday, May 9, Canadian National Telegraphs offices are ready to handle many thousands of telegrams of love and heartfelt sentiment

FAIR WORDS

Throughout the world, if it were sought
Fair words—enough a man shall find;
They be good cheap; they cost right nought;
Their substance is but only wind.
But well to say, and so to mean
That sweet accord is seldom seen.
—Sir Thomas Wyatt.

Obituary

ANNIE FJARLI

The death of Mrs. Annie Fjarli, grandmother of Mrs. E. Limpert, occurred on April 29, in Drumheller hospital. Deceased was born at Otnas, Christiansand, Norway, and was aged 75 years. Coming to Canada with her husband, who took up a homestead in the Michichi district, she had been resident in this country 23 years.

She is survived by three brothers and four grandchildren, two of whom, Mrs. E. Limpert and Mr. E. Danielson, reside in the Delia district.

Funeral services were held in Delia United Church on Sunday, Rev. R. Yorke officiating. Miss Margaret Grant provided the accompaniment for the hymns sung by the choir, which were as follows: "Jesus, Saviour, Pilot Me," "Rock of Ages," and "Abide With Me."

Pallbearers—W. Wilson, J. Lundal, Geo. Anne, Olaf Moe, Walter Jervis and Joe Fulton.

Interment took place in Delia cemetery, and arrangements were in charge of Winter Bros. Funeral Home.

Floral tributes were as follows:

The Family, Netta and Sam, Mrs. B. Limpert, Mrs. R. Beaton, George and Alec and Mr. and Mrs. A. K. McDonald, Phyllis Maclaren, Majestic and Farrell Lake Institute, Alex. Aitken. Mr. and Mrs. W. Limpert, C. A. Sloan, W. C. Hands and Alice, Chas. Lawrence, Fred Demott, Art Carson, W. O. Morrison, V. J. McNair, Bert Hands, O. Hands, J. Fulton, Wm. Herzog, W. Lawrence, E. L. Long, F. Smyrl, and W. Jervis.

Needless Fatalities

The "drowning" season is at hand.

Once more the time of the year approaches when readers of the newspapers may expect to see reports, under more or less startling headlines, of casualties in water—stories of adults and children who have gone down for the third time, never to leave the water alive.

During the late spring, summer and early fall months, water will take its annual toll of victims in the prairie provinces.

The pity of it is—and yet a consolation, too—that most of these deaths could have been avoided, for practically all drowning accidents can be tabulated within the scope of two categories, and both of them to-day are avoidable, if the necessary precautions are taken.

Some people drown because they cannot swim. Others, who are able to swim, lose their lives in the water because they are physically unable to stand the shock, and develop cramps which tie the muscles and make it impossible for them to help themselves.

The obvious preventive of loss of life in the water by non-swimmers is to learn to swim. There is nothing difficult about that. Swimming is a comparatively easy art to acquire, though, it is true, some are more apt than others and as a result learn more rapidly than others how to keep themselves afloat in the liquid element.

It is not much use forbidding boys and girls to go down to the swimmin' hole to bathe. The lads and lasses cannot be blamed very much for attempting to seek relief from the torrid heat of the July and August sun in the cooling waters of the creek, the slough or the lake, whichever may be handiest.

The joys which come from the healthful sports of bathing, swimming and diving should not be subjects of prohibition in a country where the season for such enjoyment is all too short and the opportunities for healthful recreation somewhat limited.

Instead of restriction there should be co-operation and assistance on the part of parents and teachers and every boy and girl should be taught to swim under proper supervision at as early an age as possible. In some of the tropical countries children are able to swim almost as soon as they can walk and equally as expertly. It would be almost impossible for them to drown.

Learning to swim should be part of the school curriculum and once or twice a week during the summer months, after school hours or during the vacation, children should be taught to swim and enjoy the pleasure of bathing, if there is suitable water within reasonable distance. Swimming should be as natural to the prairie child as walking or running.

As for swimmers who perish because they are not in physical condition to stand the shock of cold water, even they can be rendered immune, if recently reported discoveries of medical science are authentic.

A Rochester, Minnesota physician recently announced, as a result of research and experimentation, that he has discovered that many people are hypersensitive to cold and that this hypersensitivity can be cured in a simple and easy manner and without benefit of medical attendance or the use of drugs.

To discover whether one is hypersensitive to cold and therefore in danger of succumbing to shock in the water, all that is necessary is to immerse one hand in ice cold water for a minute or two twice a day for a three week period. If the hand swells under this treatment, it is a danger signal. The experimenter is liable to shock and drowning if he or she ventures into the water, according to this authority.

Fortunately the remedy is as easy and simple as the test. One can be cured by continuance of the hand immersion practice until the swelling disappears. Then, according to the Rochester doctor, the "patient" has become desensitized and may venture into the water without incurring any risk of drowning from cramps.

If there is scientific authority for this discovery, a combination of tuition in the art of swimming and desensitization of all who might be subject to cramps would cut down the loss of life from drowning to almost zero.

It is true that every year lives are lost because boats and canoes are upset and their occupants tilted into the water, but most, if not all, lives lost as a result of this class of accident are due to the fact that either they are unable to swim or are overcome by the shock of cold water. If the former, the risk would have been avoided by learning to swim and if the latter, by the simple method of desensitization before running the risk of going afloat in any type of capsizable craft.

The risks of drowning under either of the two causes assigned are too great to be ignored and all who embark either on or in the water should be able to carry out their emprise with confidence that their safety is ensured in advance, because they have taken all the necessary precautions to avoid death for themselves and sorrow for their friends and relatives.

A Costly Message

Proposal Telegraphed To Movie Star Cost Sender $212.85

The telegraph companies should cultivate the good will of Kay Francis, dark-haired screen beauty. She believes that a recent telegram she received is the longest telegraphed proposal ever sent a Hollywood star.

A Detroit admirer, terming himself "well fixed financially," dispatched a fervent 2,500-word telegram, which ran on over 22 telegraph forms. Miss Francis never did finish it at one sitting except to find out the man was going to Hollywood for his answer.

It cost him $212.85 to get across his romantic ideas.

An Unusual Fatality

Soldier Escaped War Hazards To Be Killed By Bicyclist

An immense crowd of people attended a funeral in London, Eng., to do honor to the memory of an Australian soldier who had been killed in a peculiar manner while in England as a member of the Australian military contingent to the coronation. He was hit by a bicyclist on Birdcage Walk, outside Wellington barracks, where the Australian contingent was quartered.

The simplicity of the accident that took this man's life illustrates the anomalies that are found in the affairs of existence. Gunner Arthur Percy Sullivan, V.C., who was the victim of the mishap, won the Victoria Cross in 1919 when he rescued four comrades from a Russian swamp under heavy fire. After an experience of that kind, the normal conclusion would be that the subject would have a reasonable chance to escape the less spectacular hazards of the streets. But there is nothing certain in that connection and human beings must be prepared for the unexpected at all times.

In its journey around the sun, the earth travels at the rate of 1,112 miles a minute.

2201

Chairman Of Press Union

J. H. Woods Of The Calgary Herald Re-Elected At Annual Meeting

At the annual meeting of the Canadian section, Empire Press Union, held in Toronto, J. H. Woods, C.M.G., of the Calgary Herald, was re-elected chairman, with the following executive:

Representing daily newspapers—J. W. Dafoe, Winnipeg Free Press; P. D. Ross, Ottawa Journal; Henri Gagnon, Quebec Le Soleil.

Representing the weekly press—E. Roy Sayles, Renfrew Mercury.

Representing the trade and class press—H. T. Hunter, president, Maclean Publishing Co., Limited, Toronto.

W. A. Craick, Industrial Canada, was re-elected honorary secretary-treasurer, and T. F. Drimmie, Saint John Telegraph-Journal, auditor.

The following were nominated to represent the section on the council of the Empire Press Union: C. F. Crandall, British United Press, Montreal; J. W. Dafoe, Winnipeg Free Press; W. Rupert Davies, Kingston Whig-Standard; Eugene Lamarche, Montreal La Presse; J. F. B. Livesay, general manager, The Canadian Press, Toronto; P. D. Ross, Ottawa Journal; Lt.-Col. J. H. Woods, Calgary Herald; H. P. Robinson, Evening Times-Globe, Saint John; H. S. Southam, Ottawa Citizen; J. S. Woodward, Saskatoon Star-Phoenix.

Reports presented showed that during the past year there had been an increase in membership. The section's news letter which was sent out monthly to all members of the Empire Press Union throughout the empire was enlarged and improved. Similar letters were inaugurated during the year in South Africa and India and these with the Australian news letter provided a valuable interchange of news by mail among the press of the empire.

Under the union's plan whereby young newspapermen are afforded an opportunity to gain experience in other parts of the empire, two Canadians have been provided with temporary positions in England, while one young newspaperman from London has been placed in Canada. Further developments in this useful interchange scheme are anticipated.

H. S. Southam, managing director of the Ottawa Citizen, and J. S. Woodward, managing editor of the Saskatoon Star-Phoenix, were appointed representatives of the section at the second annual conference of the Empire Press Union to be held in London.

New Garden Of Eden

Will Be Home Of British Troops In Suez Canal Area

New barracks to be built in the Suez Canal area on the banks of the Bitter Lake are to be the last word in modernized military comfort.

They are to be occupied by the British troops who evacuate Cairo and other garrison stations in Egypt.

Six blocks of barracks are to be erected in the Canal zone, and the plans are to be in the charge of Brigadier H. N. North, the R. E. construction expert.

They will be as unlike the old type of barrack as possible. They will be rather a township of "soldiers' villas," with all the modern comforts of the latest bungalows, and surrounded by trees and gardens.

It is the official intention to make a "Garden of Eden" in the sandy areas where the troops will have to live.

A special landing dock is to be let in the Canal side. This will allow troops to be moved by ship direct to their barracks, and will save embarking and disembarking at Port Said.

A Real Drawback

Lord Tweedsmuir's Story Illustrates Trials Of Official Position

When Lord Tweedsmuir stood before the U.S. Senate, he made an apology:

"I remember in my own country on the Scottish border there was an old minister who once a month thought it his duty to deliver a sermon upon the terrors of hell, when he sternly dangled his congregation over the abyss; but being a humane man, he liked to finish on a gentler note. He used to conclude thus: 'Of course, my friends, ye understand that the Almighty is compelled to do things in His official capacity that He would scorn to do as a private individual.' "

"I am in the unfortunate position now of having no private capacity but only an official one. I am unable to express my views upon any public question of any real importance—at least not for publication."

The Cherokees are the only Indians to have literature recorded in an Indian alphabet. Sequoyah, a Cherokee inventor, worked out this alphabet in 1821.

Popular science writer declares coal is of the same composition as the diamond. Yes, but only a carbon copy.

Because of gravity, a grandfather's clock in Spitzbergen needs a longer pendulum than one at the equator.

George VI. cannot speak German fluently, despite much family practice when a young man. His French is moderate.

Speed Has Been Exaggerated

Germany's Rearmament Program Will Take Some Time To Complete

There is no doubt about the magnitude of Germany's rearmament program; but its speed has been exaggerated. So writes Hanson W. Baldwin in a Berlin dispatch to the New York Times. After some apparently exhaustive checking up with expert observers, Mr. Baldwin writes: "Despite contrary reports, Germany was not ready last year to fight a major war when her troops marched into the Rhineland; she is not ready to-day and she will not be ready next year. It will be 1939 or 1940 at least, it is believed, before she can hope to complete training that vast reservoir of some 6,500,000 untrained men who had no experience with conscription between Versailles and Hitler. It will be two or three years at least before Germany, although straining every nerve, can pile up the reserve equipment needed for a massive army and can supply sufficient officers to command that army."

But Germany will fight before then, the Times correspondent concedes, if necessity arises to fight. "Every one of her active units is at war strength and in war camouflage, ready instantly," and "she can to-day give any nation a scrap far more vicious than it would enjoy; and she could have done so yesterday."

It is the correspondent's opinion, however, that at the time of Rhineland occupation, Germany would have been beaten, if France "had taken positive measures," and that "Germany would probably lose to-day if France were her only opponent."

The Times' observer, however, does not minimize the prospective effectiveness of Germany's vast rearmament program. Germany has a reservoir of man power "that France does not possess and which Britain, without conscription, cannot utilize!" and Germany is constantly drawing untrained men from that reservoir and turning them into soldiers.—Buffalo Courier-Express.

Boy Scouts

Broadened Activities During 1936 Reported At Annual Meeting

Increased membership and broadened activities during 1936 were reported at the annual meeting of the Canadian general council of the Boy Scouts Association.

The governor-general, Lord Tweedsmuir, as chief scout, presided, and Sir Edward Beatty, president of the association, and representatives from all parts of Canada were present.

The total membership was reported at 85,946, an increase of 5,345. As in previous years Ontario showed the highest membership, with 31,585. Saskatchewan reported 8,626, Alberta 8,032, Manitoba 7,111, and British Columbia 6,881.

Trip Is Educative

People Visiting Russia Are Shown Many Interesting Things

A trip to Russia this season means a trip to be educated. You go on a "social science observation tour," on a "sociological tour," on a "tour of social inquiry," on a "public health survey." You visit Russia for the Moscow theatre festival in September, or you make a tour of the national minority theatres, as well as the larger theatres in Leningrad and Moscow. These Russian theatres must be worth seeing, with their plays having several scenes in progress at once.

Grading Scheme Adopted

A Government grading scheme similar in nature to the United Kingdom "National Mark" control has been inaugurated in South Africa. Such farm products as meat, eggs, fruits and vegetables will come under its scope. The object will be to educate consumers to the advantage of quality foods and demonstrate to producers the value of catering to discriminating palates.

When the Shetland Islands were isolated by bad weather for 10 days exhaustion of bakers' yeast threatened the bread supply.

Bones of 2,000 hippopotami, killed by prehistoric hunters, were found in a single cave in Sicily.

There are 1,024,000 persons by the name of Johnson in the United States.

The growth of a fern is aided greatly if a little olive oil is dropped at the root.

The average length of a lion's life is 40 years.

DO YOU NEED A BUILDER?

WHEN you are miserable and perhaps in need of a good tonic, weight below normal, and you feel tired - out and weak, follow the advice of Mrs. H. M. Rhame of 141 Briscoe St., London, Ont., who said: "For a general run-down condition, nothing did more for me than Dr. Pierce's Golden Medical Discovery. Mother gave it to me and it certainly did help me. My complexion and color were bad, I lost weight and had poor digestion. After taking a few bottles of the 'Discovery,' my appetite and digestion were much improved and I gained in every way." Buy now! New size, tabs. 50c.

All's well that rolls well

All's well with the roll-your-owner who rolls his own with Ogden's Fine Cut. Always fragrant, always cool, the kind of cigarette tobacco that steers you straight down the highway to real enjoyment. Try Ogden's and choose the best papers—"Chantecler" or "Vogue".

P.S.—Your Pipe Knows Ogden's Cut Plug.

OGDEN'S FINE CUT

Poetry Competition

Westerners Receive Honorable Mention In Contest Conducted By Montreal Authors' Association

Two Toronto women were announced as first prize winners in the 1937 poetry competition conducted by the Montreal Authors' Association.

Mary I. Woodsworth, Toronto, was named winner in the lyric poetry class, for her "April."

The other Toronto winner was Edna Alice Boyd, who led the bird poem division with "Vignette of a Heron."

Honorable mention in lyric poetry was given Joseph Garvey of Larder Lake, Ont., for "The Transient." Among those commended were: Audrey Alexandra Brown, Victoria, for "Serenade," and A. Baxter, of Borden, Sask., for "The Nurse."

Honorable mention in the bird poem class was given to "The Voice," by Beresford Richards, Athabaska, Alta.; "Sea Gull," by Mrs. Melville Chater, Vancouver, and Grace Hewlett, Westbank, B.C.

SELECTED RECIPES

ORANGE DELIGHT

¾ cup scalded milk
3 tablespoons Benson's Corn Starch
Few grains salt
½ cup cold milk
1 egg yolk
¼ cup Crown Brand Corn Syrup
½ cup orange juice
1 tablespoon lemon juice
1 teaspoon orange rind, grated
1 egg white
2 tablespoons fine fruit sugar

Scald milk in top of double boiler. Mix Benson's Corn Starch and salt with cold milk; add slowly to hot milk, stirring constantly until thick. Cover and cook 15 minutes, stirring occasionally. Combine egg yolk and Crown Brand Corn Syrup; stir and add to hot mixture. Continue cooking for three minutes. Add orange juice, lemon juice and grated rind. Stir and remove from heat. Pour slowly over stiffly beaten egg white to which has been added the fine sugar. Pour into mould and chill well before serving.

Both Are Centenarians

Egyptian Census Discloses Mother And Daughter Over 100

The world's oldest living couple, a mother and her daughter, were "discovered" in a village of lower Egypt during the Egyptian census being carried out. The mother, Rifaiva El-Sayed, is 157 years old, and her daughter, Moucharrafa Hachem, is 107. Even though they are wizened and their skin looks like old parchment, the census official would not believe the ages claimed by the women until the mother began to talk about Napoleon's campaign in Egypt.

Modern Shooting Gallery

A new type of shooting gallery has been made of a duck in motion into the body of which is fixed a photo cell. The light from an incandescent lamp fixed into the gun stock is put on momentarily by the trigger controlled by the customer. If the light falls on the "target", the duck flaps its wings and simultaneously takes your photograph shooting the duck.

There is only one ship in Ecuador's navy, five in Mexico's and 14 in Peru's.

The number of sheep and lambs on Canadian farms is approximately 2,628,500.

The heart of a normal adult pumps about one gallon of blood a minute.

Extend Invitation

Rover Scouts Invited To Hold Next International Gathering In Canada

Rover Scouts from all over the world will be invited to hold their next international gathering, or rover moot, in Canada, in the summer of 1939. Announcement was made at the meeting of the executive committee of the Canadian general council of the Boy Scouts' Association. The location of the proposed rover moot camp has not yet been decided.

The invitation will be presented through the international bureau at imperial headquarters of the Boy Scouts' Association, London. It is understood Poland also is making a strong bid for the moot. The last international rover moot was held near Stockholm, Sweden, and was attended by 3,000 rovers from 24 countries. Canada was represented by a rover patrol of seven.

Roses Along Railway Line

Stretch In New York State Solid Mass Of Ramblers

The rambler roses which line many miles of New Haven tracks in four States are all taken from a deep cut at Mount Vernon, N.Y. They were planted there in 1909 at a cost of $5,000. Since that time annual cuttings and transplantings have been made so that there are now 57,000 bushes along the line, reports The Mutual Magazine. The 41-mile stretch between New York and South Norwalk is practically a solid mass of these roses. Besides beautifying the right-of-way their roots materially retard soil erosion in the cuts.—New York Times.

Panama's navy consists of only one "ship o' war," a steam yacht manned by two caretakers.

Eros Keeps His Secret

Experts Puzzled Over Metal In London's God Of Love

Eros is made of sterner stuff, but what that stuff is mystifies science. Poised on one foot on a lofty pedestal in bustling Piccadilly Circus, London, the aluminum god of love has retained its boyish figure since it was erected 44 years ago.

Corrosion has swept through London's other metal statues like an epidemic of leprosy, gnawing off ears, noses and hands and calling for expensive replacements.

Experts took instruments and performed an autopsy on Eros. At the end they declared they hadn't been able to find out the origin of the metal from which Eros was cast and whether it was made by electrolytic ore by a purely chemical process.

Works Both Ways

How Boys And Girls Handle Mental And Physical Tasks

Boys, in their anxiety to prove their strength, often attempted too much when the size of a load was left to their choice, while girls were, except in rare instances, carefully protected by tradition from possible injury, and choice of loads was rarely left to them.

It had been stated recently by a medical observer that, if habitually given too much mental work, a girl of 14 to 16 would break down while a boy would leave it undone; the exact reverse seemed to be true where the work was physical.—London Times.

Although each Indian tribe had a separate dialect, most tribes could communicate by means of a common sign language.

Pipe smoking is believed to have originated in America.

Only Firestone Tires are Gum Dipped
GUM-DIPPING INSULATES EVERY FIBRE OF EVERY CORD AGAINST INTERNAL FRICTION AND HEAT
EIGHT POUNDS OF PURE RUBBER ARE ADDED TO EVERY HUNDRED POUNDS OF CORD FABRIC
COTTON CORD FABRIC IS IMMERSED IN LIQUID RUBBER

. . . You Get 58% Longer Flexing Life at No Extra Cost!

Gum-Dipping makes Firestone tires stronger and safer. No other tire has this extra process that eliminates internal friction and heat—the greatest enemy of tire life.

All Firestone tires are Gum-Dipped—and your local Firestone Dealer has one for every purse and purpose. Drive in and let him take care of your needs.

Firestone

PHEW! IT'S SPOILED AGAIN. I SHOULD HAVE USED ROYAL

Spoiled Bread?

Watch your Yeast!

Royal protects you against home-baking failures

Royal is always full-strength . . . pure! Each cake sealed in an air-tight wrapper

APPETIZING bread must be fine-textured . . . sweet-flavored—with no hint of sourness or "yeasty" taste.

Your yeast is important. *Royal* is always dependable . . . the only dry yeast that comes sealed in air-tight wrappers. It's full-strength . . . free from impurities.

Seven out of 8 Canadian housewives today depend on Royal when they bake with a dry yeast. They know they can count on good results—even months after they buy Royal. It stays fresh. For 50 years, Royal has been the symbol of highest quality.

Don't take chances with inferior yeasts. Always use Royal! Get a package today.

Send for FREE booklet

To get uniform results in bread baking, *it is important to keep the sponge at an even temperature.* The "Royal Yeast Bake Book" gives instructions for the care of dough. Send coupon for free copy of the book, giving 23 tested recipes for tempting breads, coffee cakes, buns and rolls.

Royal Mementoes Shown

Proceeds Of Interesting Display Went To London Hospital

Queen Elizabeth's christening cap and needlework by Mary Queen of Scots were on display a few weeks ago for the benefit of a London hospital.

The mementoes of the two famous queens were among a great collection of intimate objects associated with European royalties of the last 400 years included in the Royal Treasures Exhibition opened by Princess Helena Victoria, a granddaughter of Queen Victoria. Jewels, costumes, pictures and furniture were part of the exhibition.

Queen Mary, the Queen Mother, visited the exhibition and saw a silver ewer used at her own christening.

Anne Boleyn's pink silk slippers were on display, as well as part of the robe, cap and mittens worn by her daughter, later Queen Elizabeth, at her christening.

Possessions of other European royalty occupied a section separate from the British division.

The astronomical light year is nearly six million million years.

Turkeys, in their natural state, roost in trees.

How To Overcome Piles And Rectal Soreness

If you are annoyed with itching piles or rectal soreness, do not neglect the same or run the risk of an operation. Any itching, soreness or painful passage of stool, is nature's warning and proper treatment should be secured at once. For this purpose get from any druggist, a package of Hemroid and use as directed. This formula, which is used internally, quickly relieves the itching and soreness and aids in healing the sore, tender spots. Hemroid is a physician's prescription and is highly recommended. It is easy to use and it seems the height of folly for anyone to risk an operation when a simple remedy, which is so pleasant to use may be had at such a reasonable cost.

India's Mystery Man

British Soldiers Hunting For Terror Of Frontier Country

Somewhere in the wild, barren hills of India's North West Frontier a tall man of 36, with dyed red hair and beard, flowing coat and baggy trousers, lies in hiding. He knows that 6,000 British soldiers are on their way not only to reinforce garrisons which his exploits have endangered, but also to start a man-hunt—with himself as quarry.

The tall, picturesque fugitive is Mirga Ali Khan, the Fakir of Ipi, who for 12 years has fomented and led tribal outbursts against British authority.

The fakir is an amazing character. He is a humbly born man of the people, yet at 24 he had become, by sheer force of personality, a fakir, high religious leader. This combination of religious power over his followers and daring as a warrior has made the fakir the terror of the frontier country.

He is an expert horseman, using small ponies that can dash up the side of a mountain. He is an uncanny shot, using, whenever he can, a powerful rifle stolen from the British stores in India.

No one knows where he lives. Secret Service men have sought him high and low, but without success. He travels with incredible speed, and commands fanatical loyalty. No one will give him away.

He works his followers up to a pitch of frenzy, in which they are prepared for anything, plays on their religious prejudices and tells them that this or that action by the British is a blow at Islam.

Last November British soldiers were shot by his men. British reinforcements were rushed up. Quiet was restored. The fakir lay low. The British troops were withdrawn in January. The fakir reappeared. No one knew where he had been.

Murder gangs began their outrages again. Everywhere the red beard of the fakir, his flashing eyes, his sure aim, encouraged his followers. Two British officers were murdered as they motored through the fakir's territory. All efforts to find the murderers have failed. A column of British Indian troops was attacked. Last spring, a man of his following abducted a Hindu girl, forcibly married her, made her a Mohammedan. The man was punished by the British. It was enough—the fakir played on the feelings of his followers, and made them a menace to the British.

Now the command has gone forth that the fakir must be captured.

Work Nearly Completed

Public Park Is Ireland's Memorial To War Dead

Nineteen years after the Armistice, Ireland's memorial to her 60,000 dead in the Great War is approaching completion.

The memorial takes the form of a public park laid out by the government at Longmeadows on the south bank of the River Liffey in full view of Magazine Hill and the great Wellington monument in Phoenix Park. Included in the park is a garden of remembrance designed by Sir Edward Lutyens and paid for out of the trust fund created in Ireland at the close of the Great War.

The scheme to commemorate Irishmen who fell in the Great War by a suitable memorial in Dublin, the capital of the country, has not been brought to this stage without its difficulties and delays. William Cosgrave's government in 1927 vetoed the original proposal to purchase Merrion Square, near the government buildings, and erect in it a memorial centrepiece and gates, but arrangements were made in 1931 to provide the present site at Longmeadows, the state to bear the cost of the public park.

The work has been carried out by workmen drawn 50 per cent. from British ex-servicemen and 50 per cent. from ex-servicemen of the Irish Free State army.

'Plane Used Fuel Oil

The Lufthansa (German) plane Zephyr, landed at Natal, Brazil, from Bathurst, Gambia, West Africa, on an experimental flight in which it was using crude oil instead of gasoline as fuel. Members of the crew said that the South Atlantic flight, made in 13 hours and 50 minutes, demonstrated that fuel costs could be halved by using crude oil.

The positions of the crescent moon are the result of the relative positions of the sun, moon, and earth, and can be predicted years in advance.

Flying squirrels do not fly. The flap of skin connecting the fore and hind limbs enables them only to glide.

Twenty-one per cent. of the meals eaten by Americans are eaten outside of homes.

Large modern aquariums provide seven different kinds of water for the various kinds of fishes.

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rarin' to go

The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas bloats up your stomach. You get constipated. Harmful poisons go into the body, and you feel sour, sunk and the world looks punk.

A mere bowel movement doesn't always get at the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get these two pounds of bile flowing freely and make you feel "up and up". Harmless and gentle, they make the bile flow freely. They do the work of calomel but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name! Stubbornly refuse anything else. 25c.

A Japanese Princess

Eldest Daughter Of Emperor Chose To Study English

She is a slender, bobbed-haired girl, dressed in a middy blouse and pleated skirt who takes her turn with a broom and goes to school just like any other 11-year-old. That is Princess Teru, eldest daughter of the Emperor of Japan, and much beloved among the people of the island Empire.

She sits each morning in a class with 30 other girls of noble birth at the exclusive Peeress' School studying geography, science, history and mathematics.

With five of her classmates, Princess Teru takes her turn one day each week in sweeping the schoolroom, oiling the floor, dusting and making tea for the teacher and other pupils. This little princess charming of an Imperial family that goes back almost 3,000 years, lives a curiously-blended life which balances ancient ritual and 20th century modernism. She sleeps in a western bed, eats meals and dresses for the most part in western clothes. But on occasion she must wear brocade garments woven five centuries ago, and perform age-old rites.

The princess lives in a small, unpretentious house which was built especially for her several years ago in the vast Imperial Palace enclosure. She shares this now with her two younger sisters. The girls see their mother at least once each day, and always spend Sunday with their parents.

In selecting the one foreign language she preferred to study, Princess Teru upset precedent and, instead of choosing French, she chose English. From the first the princess has shown a pronounced aptitude in her science courses.

Skim Milk For Chicks

Galvanized Dish Should Not Be Used For Feeding

Liquid skim-milk should preferably be fed from earthenware, tin, aluminum or graniteware fountains and dishes. As a rule, the milk combines with the zinc in galvanized ware and forms zinc lactate, sometimes bad for chicks and ruinous to the container itself. If it is necessary to use such a container, fill the galvanized dish with milk and set it away in a warm place for a day or so; then throw away the milk and scrub the dish. This removes most of the undesirable soluble material and the receptacle will be safer for use in feeding.

There's A Reason

Chewing gum, so I am told, is not sold at baseball parks. One would think that chewing gum is a "natural" for baseball parks—perhaps also for hockey games, and other sports assemblies. But chewing gum "satisfies"—and so makes it hard to sell peanuts and pop and chocolate bars and eskimo pies. The concessionaires of pleasure arenas ban chewing gum—for an excellent reason.—J. C. K., in Marketing.

Paved gardens, made of cinder blocks a few inches thick and nine or 10 inches wide, are predicted for the future. Plants would grow in the spaces between the blocks.

Scientists believe that the earth's interior is solid with a rigidity equal to that of steel.

Philosophy Of Great Statesman

Sir Wilfrid Laurier Never Harbored Grudge Or Spoke To Hurt

Turning toward the honored memory of one great Canadian statesman, Sir Wilfrid Laurier, it is well to recall that although he passed through many campaigns, indulged in countless debates in the House, he never spoke to hurt.

The election of 1917 saw him parting company with life-long supporters, but through it all Sir Wilfrid remained the gentleman. One of his last recorded letters was written to a political friend in the West who was much perturbed by the turn of events and the failure of the government to repeal the War Time Election Act. The reply of Sir Wilfrid was a typical Laurier utterance, starting this way:

> "The situation is a very simple one to me. It is never sound policy to harbor a grudge nor even to resent an injury except when inspired by sheer malice."

One of his last public appearances was before the Western Ontario Liberal Association at London. To the young Liberals he said:

"As you who stand to-day on the threshold of life, with a long horizon open before you for a long career of usefulness to your native land, if you will permit me, after a long life, I shall remind you that already many problems rise before you: problems of race division, problems of creed differences, problems of economic conflict. For the solution of these problems you have a safe guide, an unfailing light, if you remember that faith is better than doubt and love is better than hate.

"Banish doubt and hate from your lives. Let your souls be ever open to the promptings of faith and the gentle influence of brotherly love. Be adamant against the haughty, be gentle and kind to the weak. Let your aim and purpose, in good report or ill, in victory or defeat, be so to live, so to strive, so to serve as to do your part to raise ever higher the standard of life and of living."—Peterborough Examiner.

Saved Lives Of Two

Aboriginal Call Of Australia Was Guide For Rescuer

"Coo-ee," the aboriginal call that all Australians know, saved the lives of two survivors of the recent disaster to an airliner in the rugged country bordering New South Wales and Queensland. These two, one with a broken leg, had kept themselves alive on little but water for the nine days following the crash. Bernard O Reilly, proprietor of a guest house in the National Park, was searching the country where he thought the fallen plane might be, when he heard a coo-ee which guided him to the cpot.

Nearly 60 years ago in June, 1878, a coo-ee, called this time by a would-be rescuer, was nearly fatal to those of whom he was in search. They were Miss Carmichael and Tom Pearce, the only two survivors of the wreck of the Loch Ard, a sailing ship with a company of 52, which crashed in the night on rocks surmounted by cliffs near Curdie Inlet, 27 miles from Cape Otway, Victoria.

A resident of the district walking along the cliffs next morning, gave the familiar call in case there might be someone saved from the wreck to hear it. It was heard by Pearce, a ship's apprentice, and Miss Carmichael, a passenger whom he had rescued, but being unfamiliar to them, they imagined it to be the cry of hostile savages and for a time were afraid to answer. So they narrowly escaped being left to die of cold and starvation at the foot of an unclimbable rock wall.

Grows To Great Height

The tea plant grows to a height of 30 feet in its native state. It is an evergreen tree, which bears long narrow, leathery leaves and beautiful white or rose tinted flowers, followed by woody capsules containing three round seeds each.

Floating rocks are found in the Tennessee river.

ITALIAN KING HONOURS STORM TROOPS

The King of Italy is shown presenting a flag to a commander of the Italian Storm Troopers at a special ceremony in Rome. Behind His Majesty is the Duke of Aosta.

IF I COULD ONLY GET AN UNBROKEN NIGHT'S REST!

Up time and again because of kidney and bladder weakness? Heed nature's warning! Your system may be clogged with poisonous wastes. Take Gin Pills to soothe and tone up the kidneys—enjoy unbroken rest — see how much better you feel.

"Prove their merit through their use!"

GIN PILLS FOR THE KIDNEYS

Magistrate's Wise Idea

Official Would Give Offending Auto Drivers A Good Lesson

A magistrate in London, Ont., has declared he will recommend that an auto driver who was convicted by him on a charge of knocking a man off a bicycle and failing to remain at the scene of the accident should have his driving permit suspended for life. A few more moves like this might serve to make a few drivers sit up and take notice.

Having your driving permit suspended for a few months, with a fine or even a short imprisonment as well, is one thing, but being denied the privilege of ever sitting behind the wheel of a car again in a lifetime is something to contemplate.

As one writer recently put it, driving a motor vehicle is not a right, but a privilege to be held just as long as the privilege is not abused.

We like the London magistrate's idea a good deal better than the method suggested from another Eastern Ontario town recently. That was to put a red tag of some kind on the car of every person convicted of a breach of the Highway Traffic Act. This may sound all right at first, but it is not inconceivable that the whole thing before long would be treated as a joke.

Who would there be to see to it that the red tag were kept in place for the proper time limit? They could be pasted on, the windshield with a heavy penalty for scraping them off without the authority of a police official, but that would mean, more than likely, that few drivers would take their cars out during the time the tag was required to be kept on. This would be all right for the time, but they would be back again, and it is doubtful if their frame of mind on getting into the driver's seat again would be inducive to careful driving.

Denying a person the privilege of driving an automobile during his lifetime is drastic, but events of recent years show that only drastic measures will serve to eliminate the unnecessary danger that exists on the highways because of careless, reckless, and drunken drivers. — Port Arthur News-Chronicle.

New Treatment For Typhoid

Discovery By Italian Doctors Is Being Thoroughly Checked

What is hailed as a "new treatment for typhoid fever" has been discovered by Doctors Giuseppe Bucco and Fellucio Pistoni at the Asmara General hospital in Italian Eritrea.

Details are being kept secret by the sanitary division of the Italian colonial office until the new remedy has been thoroughly checked.

The large number of typhoid cases in Addis Ababa have offered the possibility of a large scale experiment and Dr. Bucco has been sent to the Ethiopian capital to direct the application of his cure to hundreds of Italians and natives.

Drs. Bucco and Pistoni stated their treatment is the result of years of study and numerous laboratory experiments.

The patients upon whom the new remedy was tried in Asmara hospital responded to treatment. Each case treated returned to normal good health without any residual complications.

Though the remedy is at present applicable only when the disease is at its peak, the inventors intimated it would be possible to adapt it as a prophylaxis to prevent infection by the typhoid germ.

Would Cut Expenses

If Professor's Idea For Appeasing Hunger Would Work

The next time you are hungry, don't buy a big steak—just chew a match stick.

That is the advice Dr. A. J. Carlson, University of Chicago physiology professor, gave colleagues at a conference in Norman, Oklahoma.

"Chew matches, soda straws or anything handy the next time hunger gnaws and you'll feel better," said Dr. Carlson, an authority on hunger, thirst and appetite mechanisms.

Students of the development of the race have discovered that the crime first recognized as such by human beings was treason. This was regarded as a crime before murder was so recognized.

In the latitude of the northern United States, the crescent moon is on its back in winter and more erect in summer.

Long Trip On Roller Skates

Two Young Men Travel From Boston To Los Angeles

Norman Skelly, 28-year-old rink proprietor of Pawtucket, Rhode Island, was in New York with reminiscences of a trip across the country by roller skate, and return as a hitch-hiker.

At noon Oct. 2, 1936, Skelly said he and John Shefuga, 27, started gliding along Route 20 out of Boston. At noon on Dec. 4, he added, they coasted to a newspaper office opposite the Los Angeles city hall, having covered 4,076 miles.

Skelly who operates rinks in Miami, Florida, and York Beach, Maine, submitted memoranda which is to form the basis of a book. He expected the volume to "give details, experiences, adventures, beauties of nature, in the mountains, deserts and along the highways, plus our experiences with the different people that we met on our record-making trip."

Parts of the memoranda follow:

"Averaged ten hours a day of skating and walking. Averaged 7½ miles an hour.

"Fifty-five skating days. Were on the road 64 days in all, but nine days were used as rest periods.

"Used the same pairs of skates the entire trip. Used 480 steel wheels in all. Used 960 cones on both pairs of skates. Used eight rubber cushions on both pairs of skates.

"Total cost of the trip for both $1,400.

"Abstained from all stimulants and drank nothing but milk and water. Ate five full course meals a day at 7, 9, 12, 3, 6, besides little knick-knacks such as ice cream, fruits and vegetables in between times.

"Took two baths daily, both followed by an alcohol rub.

"Rolled as fast as eighteen to twenty miles an hour on smooth, level roads.

"Carried canes and used them as brakes on downhill slopes by putting them in front of the left rear wheel and bearing down with our knees.

"Had to sleep out in the desert three nights; one in Texas and two in Arizona.

"The only recreations we enjoyed throughout the entire trip were theatres and horseback riding."

The skaters wore four inches off their canes and said they reached a speed of forty miles an hour coasting down Torrey Pine Hill outside of San Diego.

Cars Run On Wood Gas

Just A Block Of Wood And The Cars Run In Germany

While the roadsides of this country are lined with innumerable gasoline stations, Germany has hundreds of roadside depots where motorists can fill up—with a new block of wood. The cars using wood have a special engine, which costs somewhat more than a gasoline engine. It is started on gasoline, however, and runs on it for five minutes.

When the engine gets hot it obtains its fuel from the small block of wood. The process is similar to that which changes wood into charcoal. The gas thus given off drives the engine.

A small block of wood is sufficient for quite a long run, but this type of engine does not give as much speed as a gasoline engine.

The German government is assisting Germans to buy these cars, because running costs are cheap, and while Germany has no gasoline supplies she has large forests and an ample supply of timber.—Pearson's Weekly.

Comets are incredibly large. Their heads often are 1,000,000 miles in diameter, while their tails may attain 10,000,000 miles in length.

Pearls sometimes are found floating in the milk of cocoanuts.

TRAINER GIVES HIS TEAM KRUSCHEN

"Daily Dose" for Footballers

Read what one professional trainer does to keep his team in tip-top condition:—

"I am a professional trainer, at present with a first-class football team, and have been for the past fourteen years. Kruschen Salts has been very beneficial, both as a laxative and in keeping the men free from staleness. Each morning I see that every man under me takes a small amount of Kruschen Salts to assist the liver and kidneys. I have used Kruschen with all types of athletes, and also extensively among my private patients, for cases of loss of vitality, rheumatism and neuritis."—J.J.J. (Certified Masseur.)

The "little daily dose" of Kruschen Salts helps to keep the internal organs functioning regularly in their daily duties. Liver, kidneys and bowels are stimulated to healthy, vigorous activity, thus assisting them to eliminate waste products and poisons that endanger the health.

Little Helps For This Week

And as many as walk according to this rule, peace be on them, and mercy, and upon the Israel of God. Gal. 6:16.

Lord, I have given my life to Thee,
And every day and hour is Thine;
What Thou appointest let them be,
Thy will is better Lord than mine.

Before you go out into a new day ask your King to take you wholly into His service, and place all hours of the day completely at His disposal, asking that you may be ready to do exactly what He wishes you to do. Never mind about tomorrow, one day at a time is enough. Try it, and see if it is not a day of peace, so sweet that you will be thankful when tomorrow comes to ask Him to take it also. The service is not necessarily active work, it may be waiting, learning, or suffering, but shall we be less ready for any of these if it is what He appoints. Let us always ask to be prepared for whatever He is preparing for us.

Power By Radio

Power Is Transmitted To Light A Small-Sized Light Bulb

Electric power was transmitted by radio at Franklin Institute in Philadelphia. A small light bulb at one end of a room was lighted by "juice" from a high frequency wireless set at the other end of the hall.

The power required to switch on the lamp was only about half a watt, and Dr. W. F. G. Swann, institute research director who made the demonstration, warned the public not to jump to conclusions about the practical possibility of lighting homes in this manner.

The difficulty with carrying out the experiment on a large scale, he said, was to develop a method to get enough power into the wireless set to 'broadcast" it out again in large amounts.

No Sacrifice For Him

Chancellor Hitler has eaten no butter for four years, according to an article by Otto Dietrich, Nazi press chief, in the National Zeitung of Essen. Stressing the Chancellor's frugal habits, Dr. Dietrich said Hitler had stopped using butter long before there was any question of a four-year plan. Dietrich also recalled the dictum of General Hermann Goering: "Butter makes you fat."

Roman roads built before the birth of Christ now are lighted by electricity.

The Christmas of 1860 was the coldest on record in Great Britain.

Tenders for Coal

SEALED Tenders addressed to the undersigned and endorsed "Tender for Coal for Western Provinces," will be received until **12 o'clock noon (daylight saving), Friday, May 14, 1937,** for the supply of coal for the Dominion Buildings and Experimental Farms and Stations, throughout the Provinces of Manitoba, Saskatchewan, Alberta and British Columbia.

Forms of tender with specifications and conditions attached can be obtained from the Purchasing Agent, Department of Public Works, Ottawa; the District Resident Architect, Winnipeg, Man.; the District Resident Architect, Regina, Sask.; the District Resident Architect, Calgary, Alta.; and the District Resident Architect, Victoria, B.C.

Tenders should be made on the forms supplied by the Department and in accordance with departmental specifications and conditions attached thereto.

In the case of tenderers quoting for one or more places or buildings and when the total of their offer exceeds the sum of $5,000.00, they must attach to their tender a certified cheque on a chartered bank in Canada, made payable to the order of the Honourable the Minister of Public Works, equal to 10 per cent of the amount of the tender, or Bearer Bonds of the Dominion of Canada or of the Canadian National Railway Company and its constituent companies, unconditionally guaranteed as to principal and interest by the Dominion of Canada, or the aforementioned bonds and a certified cheque if required to make up an odd amount.

The Department also reserves the right to demand from any successful tenderer a security deposit in the form of a certified cheque or bond as above, equal to 10 per cent of the amount of his bid, to guarantee the proper fulfilment of the contract.

By order,

J. M. SOMERVILLE,
Secretary.

Department of Public Works,
Ottawa, April 16, 1937.

Notice of Preparation of Assessment Roll

The Village of Delia Assessment Roll, 1937

NOTICE IS HEREBY GIVEN that the Assessment Roll of the Village of Delia for the year 1937, has been prepared and is now open for inspection at the office of the secretary treasurer from ten o'clock in the forenoon to four o'clock in the afternoon on every day which is not a public holiday, except Saturday, and on that day from ten o'clock in the forenoon until two o'clock in the afternoon, and that any person who desires to object to the entry of his name or that of any other person upon the said roll or to the assessment of any property or to the assessed value placed upon any property, must within thirty days after the date of this notice lodge a complaint in writing with the secretary-treasurer.

Dated this 30th day of April, 1937.

LESLIE STEPHENS,
18a Secretary-Treasurer.

MORE SCHOOL TAXATION?

A matter of interest to all taxpayers in the Delia School District is contained in the proposal for the introduction, locally, of a system of training outside the usual scope of educational subjects taught in country schools. The new curriculum embraces grades VII to XII, and is compulsory for these students if introduced. They have, however, the option of choosing subjects ranging over a wide field, from arts and crafts to woodwork and including, among others, dramatics and typewriting, electricity and household economics. Questionaires have been sent to the pupils in the village schools in the Hanna inspectorate, and at a meeting of trustees from Craigmyle, Delia, Hanna and Morrin, the matter was explained by two inspectors who were in attendance

From the information gathered, it is calculated the capital cost for equipment would be $1,700.00. It was stated that two instructors would be necessary to serve the four schools at salaries of, at least, $1,500 00 annually, travelling expenses being an extra, and the consensus of opinion is this would entail a combined total of $4,000.00. Of this amount Hanna is slated to pay two-fifths, the remaining three school districts one-fifth each. This would mean that Delia would, in the first place, be called upon to raise an extra $400.00 annually (it should be mentioned the government promises to grant dollar for dollar on this account), in addition to the capital outlay mentioned above. An added annual charge is inescapable in the case of Delia; by reason of the necessity of using the old school building to accommodate the diverse elements contained in a synopsis of subjects chosen by the school pupils. Fuel, lighting, upkeep and janitor service are items for which the government does not pay a proportion.

Theoretically an excellent scheme; the crucial point for taxpayers is the financial aspect. The balance sheet for the Delia School District shows arrears of taxes at Dec. 31, 1936, of $12,913 00 Of this, over $5,600 00 are arrears on farm lands and $7,300 00 on village property, while it should be noted that the annual levy on farm lands is about $1,000 00 and on village property $5,000.00. Now that the Lambton municipality has lowered assessments on farm land around Delia, with the fixed rate of 10 mills, income on this account is certain to shrink. Bearing in mind the actual impossibility of collecting taxes already being levied, due to the prolonged period of unfavorable crop seasons, this scheme will hardly commend itself to those who ultimately must assume its cost.

With the usual inconsequence of fervid educationalists to fundamentals, the trustees were informed the scheme will be forced upon the districts concerned. It seems to be entirely overlooked that the country here is purely agricultural, and that upon its successful results the prosperity of all the people depend.

Finally, it might be as well to offer the pedagogic mind a remark made by the late George Moore: "It should be clear to everybody who gives five minutes thought to the question that the destiny of the great majority of mankind is to dig the field."

Since the cause is greater than the man, a theme song for the insurgent wing of the Social Credit party is suggested by recollections of the old war-time jingle:

"Though we hate to lose you,
We think you ought to go."

Local and District

Mrs. Dutton was visiting in Castor during last week.

• • •

Shervil Wood took over the management of the Crown Lumber and Hardware Co. on Tuesday last.

• • •

John Kissick, who has been ailing for some time lately, died about 4 a.m. on Tuesday of this week.

• • •

Miss Ruby Carmichael spent the week-end in Carbon, visiting with her sister, Mrs Shervil Wood.

• • •

Mr. and Mrs. W. B. Dunlop were visiting in Calgary from Thursday until Sunday of last week.

• • •

Mrs. Norman Burke, of Leo, Alta. was a visitor in Delia on Saturday, April 24th.

• • •

Jas. King, who was a patient in Drumheller hospital recently, is now home completely recovered.

• • •

A meeting of trustees of schools within the Hanna inspectorate was held at Craigmyle on Wednesday of last week.

• • •

Mr. and Mrs. Geo. Wilton, Mrs. Wm. Gibson and Mrs. E. Robinson, were visitors to Calgary on Monday of this week.

• • •

A big dance, sponsored by the local branch of the Canadian Legion, B.E.S.L., will be held in the Olympia Theatre, on the evening of May 12th, Coronation Day.

Chas. Hamilton returned home last week, having completed a business course at Garbutt Business College in Calgary.

• • •

"Dad" Wm. Aitken is reported resting comfortably in Drumheller hospital, to which he was removed on Wednesday of last week.

• • •

Margaret, daughter of Mr and Mrs. Wm. Herzog, of Majestic, is reported to be progressing favorably after an operation for appendicitis which she underwent in Drumheller hospital last week.

• • •

Staff-sergeant Skelton, of the Drumheller detachment, R.C.M.P., well known to many in the Delia district, is stated to be retiring from the service. He is succeeded by Sergeant W. H. Fleming, who was formerly stationed at Cardston.

• • •

A fairly heavy fall of snow took place during the night of April 22-23, and although a high wind drifted it into banks the moisture content was of exceptional value. Since then the weather has been warm and sunny.

• • •

Mother's Day, which is the second Sunday in May, falls on May 9th. As is well known, the object of the day is to recall memories of the mothers who have passed to the beyond and to pay special tributes of affection to those living.

• • •

Myrle Swainston, of Stonelaw, met with a sad accident on Saturday While washing dishes at the stove her clothing caught fire, and she was badly burned about the arms and body. Taken to the hospital at Big Valley, she is remaining under the doctor's care.

• • •

Wandering through the hills south of Delia recently, a massive cement foundation, 42 x 26, was discovered on the property of S. A. Peterson. In one corner was a cement enclosure 16 x 8, and inquiry disclosed this is intended for a cistern. Erection of the house itself has, unfortunately, had to be postponed. Mr. Peterson having been disappointed in the failure of the government to implement its promise of an interest free production loan, and has now only the crop prospect to rely upon.

• • •

It is learned that Messrs. Galbraith & Co., Ltd., have promoted a company, backed by investors in Toronto, to proceed with the manufacture of carbon black on the S. W. qr.-sec. 36 32-17 w4, known as the Echlan farm. This project has been talked of throughout the district over a period of years, but the present company appears to mean business. Cement foundation for the factory has already been built by Jack Armstrong, of Craigmyle, and material for a building of metal construction, together with the necessary machinery, is expected on the ground in the immediate future. It is stated that production will entail three shifts of labor, a 24-hour daily output being aimed at, and housing accommodation is to be available on the company's property. It is also rumored the company is prepared to drill an additional forty wells to aid in the undertaking.

COMMUNITY CLUB

The April meeting for the Community Club met in the Rest Room, Mrs. Hudgeon in the chair. The opening reading was John 1:3, which was followed by the singing of "O, Canada," and our favorite songs.

The minutes for the March meeting were read and adopted.

It was moved that we send to Edmonton for books for the library. We decided to make a rug, and raffle, with Mrs. J. Dymtruk as supervisor.

Letters of thanks were read for fruit sent to the sick.

Moved a resolution be sent to Edmonton that a protest be sent for the reduction of Mothers' Allowances.

Treasurer's report was then read.

The supervisor, Mrs. Farquharson, took the reading, "State Medicine and Hospitalization," which was very interesting and educational—Dr. Gillis's report on State hospitalization, where the doctor send no bills.

Delegates for the meeting pertaining to the Coronation celebration are Mrs. Lowe and Mrs. Hudgeon.

Hostesses for May—Mesdames Bryan and Lowe.

Supervisor—Mrs. K. Harcus. Topic: "Faith."

Roll Call—"Hints on Gardening."

Hostesses — Mesdames Murray and Jolleys.

Current Events—Mrs. Jolleys.

Lunch was served by Mesdames Morrison and Dymtruk, which brought a delightful close to the meeting.

This club does not connect the name of a person, who refutes requests made by him to the organization, with that of a gentleman.—Con.

UNITED CHURCH OF CANADA

Annual Meeting of Drumheller Presbyterial Held in Delia United Church

The annual meeting of the Drumheller Presbyterial of the United Church of Canada was held in Delia at the United Church on Tuesday, April 13, 1937, at 9:30 a.m. Mrs J. A. MacLachlan, acting president, presided.

Mrs. W. F. Pratt, Hanna convenor of the nominating committee, appointed the following committees:—

Resolution—Mrs. E. A. Toshack, Drumheller; Mrs. J. J. Bradford, Delia.

Courtesy — Mrs. O. G. Sibbald, Munson; Mrs. N. Davis, Drumheller; Mrs. F. J. Hartley, Hanna.

Business — Mrs. Harcus, Delia; and Mrs. A. Maynes Hanna.

Finance — Mrs. J J. Bradford, Delia; Mrs. G. Powell, Drumheller; Mrs. O. G. Sibbald, Munson; Mrs. A. Morrison, Delia.

Reports were presented by Mrs. O. G. Sibbald, Munson, corresponding secretary.

Treasurer—Mrs. J J Bradford, Delia.

Mission Monthly and World's Friends—Mrs. C. Forbes, Hanna.

Associate Helpers — Mrs. G. M. Gibson, Drumheller.

Secretary Affiliated C.G.I.T. — Mrs N. Davis, Drumheller.

Temperance — Mrs. E. M. Bigelow, Delia.

Strangers' Secretary — Mrs. G. Powell, Drumheller.

Supply Secretary — Mrs. F. J. Hartley, Hanna.

Literature Secretary—Mrs. R. R. Fraser, Munson.

Baby Bands— Mrs. W. B. Dunlop, Delia.

Press—Mrs. W. F. Pratt, Hanna.

Christian Stewardship — Mrs. E. A. Toshack, Drumheller.

Mission Circle—Mrs. N. Davis, Drumheller.

Mission Band—Mrs. K. Harcus, Delia.

An abstract of the executive minutes was read by Mrs. W J. Barss, Delia. All gave interesting and encouraging reports. The forenoon session closed by worship service, led by Mrs. R R Fraser of Munson. The dedicatory prayer was led by Miss A. Ratz, of Drumheller.

The members were entertained at lunch. Mrs Harcus of Delia, welcomed the visitors, and Mrs. G M. Gibson made the reply.

The afternoon session opened at 2 p m, with Mrs. MacLachlan, president, in the chair. Worship service was led by Mrs. Toshack, of Drumheller. Mrs. E. M. Bigelow, Delia, led the discussion on various subjects of the work, which proved instructive to all.

Mrs. MacLachlan of Drumheller, and Miss Nicholson, also of Drumheller, gave interesting and inspiring addresses.

Mrs Pratt, convenor of the nominating committee, presented her slate of officers for 1937, which was accepted as presented.

Past President—Mrs. C. F. Rannie, Calgary.

President—Mrs. J. A. MacLachlan, Drumheller.

1st Vice-President—Mrs. W. F. Pratt, Hanna.

2nd Vice-President—Mrs. F. J. Hartley, Hanna.

Recording Secretary—Mrs. W. J. Barss, Delia.

Corresponding Secretary—Mrs. O. G Sibbald, Munson.

Treasurer—Mrs J. J. Bradford, Delia.

Secretary of Christian Stewardship and Finance—Mrs. E. A. Toshack, Drumheller.

Secretary for Affiliated C.G.I.T.—Mrs. N. Davis, Drumheller.

Secretary of Mission Bands—Mrs. K. Harcus, Delia.

Secretary of Baby Bands—Mrs G. Hipperson, Hanna.

Associate Helpers' Secretary — Mrs. G M Gibson, Drumheller

Supply Secretary — Mrs. W. B Dunlop, Delia.

Strangers' Secretary — Mrs G. Powell, Drumheller.

Literature Secretary—Mrs R R Fraser, Munson.

Missionary Monthly and World's Friends—Mrs C Forbes, Hanna

Temperance — Mrs E. M. Bigelow, Delia.

Press Secretary—Mrs. A. Maynes, Hanna

Rev Schrag, of Drumheller, led in the installation prayer. Mrs. Gordon and Miss Conkey rendered a duet.

Nominating Committee for 1937—Mrs. W. F. Pratt, Hanna; and Mrs. E. A. Toshack, Drumheller.

Rev. F J Hartley, of Hanna, led in closing prayer

Lunch was served at the close of the meeting by Delia ladies.

Fish Mousse Delicious Variant in Party Menu

Hostesses who serve fish mousse after their next bridge party or at their next luncheon will find they've happened upon a dainty dish that adds delicious variety. As they are making it they'll be surprised, too, how easily and quickly it can be prepared.

Here are the ingredients that are required: Two cups of canned salmon, a cup of fish broth, a tablespoon of gelatin, a cup of whipping cream, a quarter of a cup of cold water, a half tablespoon of salt, and pepper to suit the taste. And here is the method of preparation, as outlined by Miss Estelle LeBlanc, fish cookery demonstrator of the Dominion Department of Fisheries: Soak the gelatin in the cold water for five minutes, then add the salt, pepper and hot broth, and allow this mixture to cool; then, having finely shredded the fish add it to the liquid and when it has partly set add the whipped cream, and place the completed mixture in a mould which has previously been rinsed in cold water. To make the cup of broth, put the bits of bone and skin from the can of fish into cold salted water and boil them for a few minutes, then drain the broth and add it to the salmon liquid from the can.

"Sometimes," said Miss LeBlanc in talking of the mousse, "I put in small individual moulds but sometimes I use a single fish-shaped mould such as anyone can obtain at a kitchenware store. Incidentally," she added, "salmon is not the only fish suitable for use in making mousse but the colour of the salmon adds to the attractiveness of the appearance.

"The recipe I have given makes sufficient mousse for twelve servings."

Special Fares for Coronation Day

The observance of Coronation Day throughout the Empire on Wednesday, May 12th, will include celebrations at important points across Canada and, to facilitate economical travel for this occasion, the Canadian National Railways will place in effect reduced fares

These fares will consist of single fare and one quarter for the round trip, good in coaches; or in sleeping cars or parlor cars on payment of the regular charge for such accommodation. Fares will be good going during the period from and including Tuesday, May 11 up to 2 p m. of Wednesday, May 12. The return movement will be good to leave destination up to midnight on Thursday, May the 13th.

Canadian Eskimo is Crack Shot

Few white hunters will tackle a polar bear with a .22 rifle, but it is all in a day's hunting with the Canadian Eskimo. He needs food, and he needs furs, and the polar bear provides both. The manner in which the Eskimo in Canada's Arctic is gradually forsaking the harpoon and spear for the rifle is told in an interesting story, entitled, "Eskimo Target," by Thomas Wayling, in the April issue of C-I-L Oval. The Canadian Government has adopted a policy of encouraging the use of firearms for hunting by the Eskimo, as they give the little native that margin of safety at close quarters he so sorely needs, and what is more he has become a crack shot with the rifle, which he numbers amongst his most cherished possessions.

"Fashion Reflects the Coronation"

—*says JANE DEE.*

AS the time for the Coronation draws closer and closer, there is mounting excitement in clothes and all accessories. This spectacular event has had a tremendous influence on fashion. Not only has the Coronation influenced the color trend, but also the styles, the fabrics—even the designs in printed materials. And fashion-conscious women are choosing their outfits according to this new trend.

Why not be up-to-the-minute yourself in this connection? It's easy. Just write to me. Let me tell you all about the Coronation influences, or plan an outfit for you in Coronation colors. But remember, I require an adequate description of your coloring, weight and figure. A snapshot of yourself would be very helpful.

Surgery of the Seas

Dr. Adam N. Beattie, surgeon of the Canadian Pacific liner Empress of Japan, and his ship's nurse, Miss Margaret Grant Allan, who are shown here, performed two delicate operations during the ship's round trip to the Far East, via Honolulu, just completed in Vancouver. On the outward trip, between Honolulu and Yokohama, the liner's huge turbines were stilled for nearly an hour while Dr. Beattie removed a ruptured duodenal ulcer from a Chinese passenger. On the homeward trip, between Hong Kong and Shanghai, the London, Ont. doctor's skill was again called into play when a Chinese saloon steward was stricken with acute appendicitis. Both patients are recovering well, the physician reported. Dr. Beattie, former house physician at Vancouver's St. Pauls hospital, and graduate of University of Western Ontario's medical school at London, Ont., stated that the Empress of Japan's splendidly equipped operating room made the operations little different in practice from any performed in large hospitals. His assistant, Miss Allan, is a graduate of St. Pauls hospital, Saskatoon. She has been in the Empress of Japan for the past three and a half years and previously was in the Empress of Russia. Dr. Beattie first went to sea in 1933 aboard the Canadian-Australasian liner "Niagara" out of Vancouver.

—Canadian Pacific Photo.
